

# What's in that Nest?

Fellow Mortals is here to help when Accidents Happen. **There is NO CHARGE for our Services—we rely on Donations** to provide care for Injured & Orphaned Wildlife.

This is a newborn baby squirrel. It weighs about 1/3 ounce (10 grams). There are from 4-7 babies in a nest. They cannot hear until they are about 2 weeks old. Their eyes do not open until they are 3-4 weeks old. Baby squirrels stay with their mother until the second litter is born in late summer.

**Baby squirrels nurse until they are 8 weeks old.**

Babies are in Danger when Branches are Trimmed or Trees are Cut Down and

1. Mom is killed
2. Babies are injured
3. The nest is destroyed or on the ground
4. Babies get chilled
5. Mom doesn't have a place to take them

**Every Situation is Different—we'll Help you Reunite the Babies with Mom or will Take them Into Care.**

**Call 262-248-5055 & leave a message. We'll call you back promptly.**

These babies are 4 weeks old. Their eyes have just opened. If they fall from their nest or if they are orphaned, they will walk up to people and pets and try to find help. They will not survive on their own.

Buddy Squirrel Thanks you for caring about squirrels!
